PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in computer networks, operating systems, and system-level troubleshooting. Experienced in building real-time and backend applications using Python, Node.js, and ReactJS, with a focus on reliable and scalable system design. Skilled in analyzing issues, debugging systems, and working in Linux-based environments. Strong problem solving, communication, and teamwork abilities aligned with technical skills.

EDUCATION

- Jaypee University of Information Technology** July 2022 – June 2026
Bachelor of Technology – Computer Science & Engineering Solan, India
 - CGPA: 8.41
 - Qualified GATE 2026 (Computer Science & Information Technology)
- Army Public School** May 2021
CBSE Class XII – 93.6% Chandimandir Cantt, India

TECHNICAL SKILLS

- Programming:** C, C++, Python, JavaScript, TypeScript, Java, Bash (Shell Scripting)
- Databases:** MySQL, SQL
- Backend & APIs:** Flask, Node.js, Express, REST APIs
- Web Technologies:** ReactJS, HTML, CSS
- Tools:** Git, GitHub, Postman, Docker, Burp Suite, Wireshark (basic)
- Operating Systems:** Linux, macOS, Windows
- Core Concepts:** Data Structures and Algorithms, Object-Oriented Design, Database Management Systems, Operating Systems, Computer Networks, Cloud Computing

PROJECTS

- Oikode – Real-Time Collaborative Code Editor** 2025
 - Built a real-time collaborative web application enabling multiple users to write, edit, and execute code simultaneously
 - Implemented live synchronization of files, cursors, chat, and whiteboard actions using WebSockets (Socket.IO)
 - Designed a client-server architecture with React (TypeScript) frontend and Node.js + Express backend
 - Integrated sandboxed multi-language code execution (40+ languages) with real-time input/output handling
 - Technologies: ReactJS, TypeScript, Node.js, Express, Socket.IO, REST APIs, Tailwind CSS
- AutoNotes – AI Media Summarization Tool** 2025
 - Built a full-stack application to generate concise summaries from YouTube videos and local media files
 - Developed RESTful APIs using Flask for media ingestion, transcription, and summarization
 - Improved transcription speed through optimized speech-to-text pipelines
 - Designed a responsive frontend to manage uploads, processing status, and summary output
 - Technologies: Python, Flask, JavaScript, FFmpeg, YouTube API
- Student Database Management System**
 - Developed a Python and MySQL based application to manage student records
 - Designed schemas and implemented SQL queries to support CRUD operations
 - Ensured data persistence and integrity through backend validation
 - Technologies: Python, MySQL, SQL

ACHIEVEMENTS

- Smart India Hackathon 2023** 2023
Top 5 Teams in Selection Round National Level
- Hache 3.0 – ACM Cybersecurity Competition** 2023
3rd Position – 24-hour Capture The Flag University Level
- Qriosity – ACM Technical Competition** 2023–2024
1st Position (2024), 2nd Position (2023) among 50+ participants University Level
